Jeanne,
Please work with and through Alice on this and all things HF in which NRMRL is involved. Alice will coordinate within NRMRL. Please meet with Alice on the Range prospective case study.

As mentioned, we have now selected technical leads for the upcoming prospective case studies and they are within one of our divisions in Cincinnati. Of course, we will coordinate across NRMRL and ORD under Alice's leadership.

Alice is working with our new leads to to begin to bring them up to speed.

In addition, when we met with Chesapeake last week, Chris Hill asked who he should be in contact with regarding the prospective case study. To avoid confusion, I asked him to work through me for now (he had been talking directly with Ada). I also explained Alice's leadership and coordination role and that we were working on staffing.

Thanks,
Cindy

Subject:	time to plan

Hi Gary,

I have been in a few meetings this week regarding starting up a prospective case study w/ Range in PA. I think you may have been in meetings with Chesapeake on prospective case studies as well. We need to plan staffing, budget, logistics and schedule for the Range case study in particular.

Who should I be working with on this.

Issues include:

division of labor w/ DOE and USGS

who will provide the intellectual effort for the scientific design?

who will be the primary point of contact w/ me and DOE on this?

what mechanisms already exist to support this, and with what funding? when does the funding and/or mechanism expire?

what additional mechanisms are needed?

which contractors are we going to use for what activities (relevant to signing agreements in addition to workload allocation, budget and schedule)

the list goes on.

Can we chat about this asap (Monday)? I'll send an invitation via lotus notes.

Should I include Dave Jewett on the invitation?

If you are not the right person, please let me know who to talk to.

thanks,

Jeanne
